

Group Quality Policy Statement

We, the Executive Directors of ACES Group supported by the management team, declare our commitment and responsibility for the organization-wide implementation of a quality management system (QMS) established in compliance with the requirements of ISO 9001:2015.

Our main objective is to achieve high levels of customer satisfaction by consistently delivering technical services that meet or exceed the needs and requirements of our customers and other interested parties including the applicable legal requirements. To further support that objective, ACES branches adopted requirements of ISO/IEC 17025 and other Quality Management Standards including, ISO 14001 and/or OHSAS 18001. The branch level Quality Systems are documented in the branches Quality Manuals.

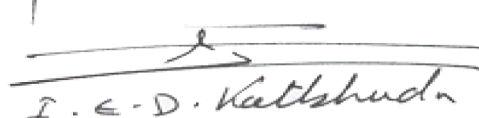

To ensure that our strategic decisions are based on understanding of the context of our organization, that our processes meet the planned outcomes at all times, and that the quality management system is continually improved, we have furnished the necessary resources, developed processes, policies, procedures, controls, analysis and records; and identified measurable objectives within the various departments and branches of ACES Group to support this policy. We have built a network of suppliers that is based on trust and knowledge exchange to ensure that inputs to our processes lead to delivering the best outputs.

We also demand that each business unit within ACES Group, all of its employees, and its management perform their duties to the highest ethical standards in compliance with all relevant legal principles. This standard of behavior is manifested in our "Integrity and Professional Conduct" policy. It is maintained during all processes related to employees, customers, suppliers, and other stakeholders. We have adopted the risk-based thinking within the group by identifying risks, on an ongoing basis, that affect achieving the intended outcomes of our Quality Management System including risks related to impartiality, and taking actions to manage these risks.

Each ACES member shares responsibility for the quality and competence of the services delivered within his/her control. This company-wide participation and contribution towards the achievement of the objectives, is made possible through leadership by example, through training and encouragement on an on-going basis, through the effective communication of this policy. We have also defined and communicated the responsibilities and authorities of ACES personnel through a clear organizational structure and job descriptions. We established a coherent quality structure within ACES that can effectively supervise and guard the quality management system across the whole group.

In performing our operations, we are committed to provide a safe working environment and to ensure that no damage is made to the environment due to our activities.
